Develop Extensions Using SAP Build Apps - Course Completion

Course Completion - Intermediate Level

Issued by SAP Learning on April 22, 2026

This badge verifies that the learner has completed the course "Develop Extensions Using SAP Build Apps" on Intermediate Level. The learner is familiar with the following topics: - Build advanced apps that consume SAP backend data as well as create data models to hold extended data for SAP extensions.

- Get experience with collaboration tools so that they can share and work together with their teams on SAP Build Apps projects.
 - Take a deep dive into the standard SAP Build Apps tooling.
 - Explore the marketplace for UI controls and flow functions.
 - Build new or extend existing UI controls and flow functions.
- Work with the style and layout settings to create pixel-perfect UIs.

Skills: Development Environment, Cloud Application Development, Application Development
